Journal of Atmospheric Chemistry (2007) 58

Contents of Volume 58

Volume 58 No. 1 September 2007

MUKESH SHARMA, SHYAM KISHORE, S. N. TRIPATHI and S. N. BEHERA / Role of atmospheric ammonia in the formation of inorganic secondary particulate matter: A study at Kanpur, India 1–18

LISA K. WHALLEY, KATE L. FURNEAUX, TOM GRAVESTOCK, HELEN M. ATKINSON, CATHERINE S. E. BALE, TREVOR INGHAM, WILLIAM J. BLOSS and DWAYNE E. HEARD / Detection of iodine monoxide radicals in the marine boundary layer using laser induced fluorescence spectroscopy 19–40

ZIFEI LIU, LINGJUAN WANG, DAVID BEASLEY and EDGAR OVIEDO / Effect of moisture content on ammonia emissions from broiler litter: A laboratory study 41–54

K. SLEZAKOVA, M. C. PEREIRA, M. A. REIS and M. C. ALVIM-FERRAZ / Influence of traffic emissions on the composition of atmospheric particles of different sizes – Part 1: concentrations and elemental characterization 55–68

RYUICHI WADA, JOSEPH M. BEAMES and ANDREW J. ORR-EWING / Measurement of IO radical concentrations in the marine boundary layer using a cavity ring-down spectrometer 69–88

Volume 58 No. 2 October 2007

MELANIE LOUISE INEZ WITT, STEPHEN SKRABAL, ROBERT KIEBER and JOAN WILLEY / Photochemistry of Cu complexed with chromophoric dissolved organic matter: implications for Cu speciation in rainwater 89–110

J. ARTETA and S. CAUTENET / Study of ozone distribution over the south-eastern France (ESCOMPTE campaign): discrimination between ozone tendencies due to chemistry and to transport 111–130

JÖRG KLEFFMANN, TRAIAN GAVRILOAIEI, YASIN ELSHORBANY, MILAGROS RÓDENAS and PETER WIESEN / Detection of nitric acid (HNO_3) in the atmosphere using the LOPAP technique 131–150

BRYAN J. HOLMES and GIUSEPPE A. PETRUCCI / Oligomerization of levoglucosan by Fenton chemistry in proxies of biomass burning aerosols 151–166

PANAGIOTIS T. NASTOS, DIMITRIOS ALEXAKIS, HELEN A. KANELLOPOULOU and AKINDINOS E. KELEPERTSIS / Chemical composition of wet deposition in a Mediterranean site Athens, Greece related to the origin of air masses 167–180

Volume 58 No. 3 November 2007

R. IANNONE, R. KOPPMANN and J. RUDOLPH / A technique for atmospheric measurements of stable carbon isotope ratios of isoprene, methacrolein, and methyl vinyl ketone 181–202

Z.-H. SHON, G. LEE, S.-K. SONG, M. LEE, J. HAN and D. LEE / Characteristics of reactive nitrogen compounds and other relevant trace gases in the atmosphere at urban and rural areas of Korea during May–June, 2004 203–218

ROBERT J. KIEBER, JOAN D. WILLEY, ROBERT F. WHITEHEAD and SETH N. REID / Photobleaching of chromophoric dissolved organic matter (CDOM) in rainwater 219–235

MINGQIANG HUANG, WEIJUN ZHANG, LIQING HAO, ZHENYA WANG, WENWU ZHAO, XUEJUN GU, XIAOYONG GUO, XIANYUN LIU, BO LONG and LI FANG / Laser desorption/ ionization mass spectrometric study of secondary organic aerosol formed from the photooxidation of aromatics 237–252

LAURA T. IRACI, BRENT G. RIFFEL, CARLY B. ROBINSON, REBECCA R. MICHELSEN and RACHEL M. STEPHENSON / The acid catalyzed nitration of methanol: formation of methyl nitrate via aerosol chemistry 253–266
